KEY STRENGTHS

- Stability
- AB Class 4/3/2 Channel amplifier
Dedicated to sound quality
- Stable under $2\ \Omega$
- Audiophile Transistors
- High performance massive
heat dissipation chassis
- High power and current dynamic reserve

(optional)

We developed these amplifiers LIVE, by taking into account every parameter, we compared and listen to each component. The result is a huge reserve of energy that reproduce natural music with every detail and with impressive strength.

With their great volume, they dispose of a large dissipation surface that assures stability and performance. Their sober and robust design has high end finish and they are available in two colors black or silver.

BLAM wishes you long hours of enjoyment !
